REMOTE CARE

The *RemoteCare App* is designed for the remote communication between the hearing aid wearer and their audiologist.

The app allows the hearing aid wearer to have follow-up appointments with their audiologist from the comfort of the wearer's preferred location.

The app enables data communication between the wearer's hearing aids and their audiologist through a stable internet connection.

The app runs on the wearer's *Apple iOS* device. It allows the hearing aid wearer to see, hear and send text messages to their audiologist during their remote care appointment.

Bronwen Hofmeister (Audiologist) is having exciting feedback from her clients who are using this *RemoteCare* app.
